Enrad Performance Integration Climacheck

A lifelong relationship is built on security, sustainability and understanding. That is exactly what Enrad offers with its new EPIC service. With EPIC, we take responsibility for your heating and cooling and we follow our machines from installation to recycling.
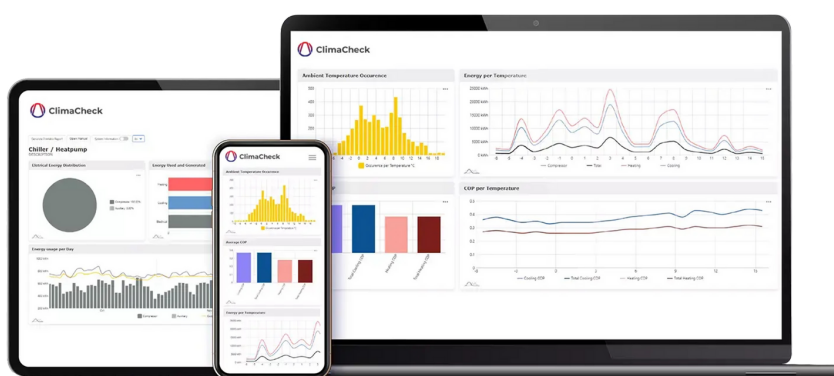

EPIC allows you to see in real time how your heating and cooling systems are doing. Through advanced monitoring of compressors and cooling processes, we receive alerts if something needs to be fixed and you can get help solving problems remotely, which enables faster troubleshooting and optimization for increased energy efficiency.

With EPIC, you get a digital partner that ensures best performance and safe operation.

- **Predictive maintenance:** We carefully monitor the health of the machines in real time, regarding both performance and efficiency, to prevent breakdowns and damage. This reduces the risk of unexpected repairs and extends the life of the system.

- **Energy saving:** By optimizing energy consumption, you save plenty of energy, while reducing wear on the equipment and keeping operating costs down.

- **Energy and performance reporting:** As a customer, you receive ready-made report templates and documents to easily report your energy consumption and performance history for the last 24 months, which simplifies your energy declarations.

If you would like to know more about EPIC, contact us at info@enrad.se.
